

*The Women's Health Study:  
From Adolescence to Adulthood*

In order to learn more about women's health over the life span, the Boston Center for Endometriosis is sponsoring **The Women's Health Study: From Adolescence to Adulthood**.

A biorepository and database are being created to serve as a resource for researchers at Boston Children's Hospital, Brigham and Women's Hospital, and outside institutions.

## *The Women's Health Study: From Adolescence to Adulthood*

**The Women's Health Study** explores topics of health that affect women over the lifespan, from adolescence to adulthood. Females ages 7 years and older are eligible to participate.

Participation is voluntary.

Parental consent is required for participants under 18 years old.

*Study participants are asked to provide the following:*

- Answers to health questionnaires
- Urine and saliva samples
- Blood sample (OPTIONAL)

Some patients who are having surgery are eligible to provide more samples.

Participants are asked to complete surveys and/or to give samples once per year.

As a token of appreciation, gift cards will be distributed to participants for each year of study completion.

For more information and to see if you are eligible, please contact the study team:
